

SUSTAINABLE SCHOOL DESIGN AND OPERATION:

A WHOLE SCHOOL APPROACH

TUESDAY 14 JUNE 2011, 9.30AM-4.30PM

HUGH ASTON BUILDING, DE MONTFORT UNIVERSITY

Tuesday 14 June 2011, 9.30am–4.30pm

Hugh Aston Building, De Montfort University,
Leicester LE1 9BH

The Institute of Energy and Sustainable Development (IESD) at De Montfort University (DMU) and the Leicester City Council invite you to attend an exciting, FREE and interactive event to celebrate the success of their work surrounding the design and operation of sustainable schools.

This unique event will encourage interactive participation, discussions and an exchange of ideas relating to all aspects contributing to sustainable schools. This is a great opportunity to hear about the findings of the collaborative research and discover best practise in sustainable school design, operation and teaching from a number of different schools and local authorities.

There will be three key note speeches throughout the day including **Bryan Davies HMI**, Head of Sustainable Development for OFSTED. Each focuses on three main areas:

- The Design, Development and Operation of Future-Oriented Schools
- Education for Sustainable Development
- Adopting a Whole School Approach to Sustainability

This **FREE** event will also include informative and interactive workshops for adults and young people to learn how other schools are successfully reducing their energy consumption.

Numbers for this free event are limited so register now to reserve your place at dmu.ac.uk/schoolsevent
